

STANDARD LIBRARY NOTES

Use Excel or a database backend to place automatically notes in drawings according to the type of parts.

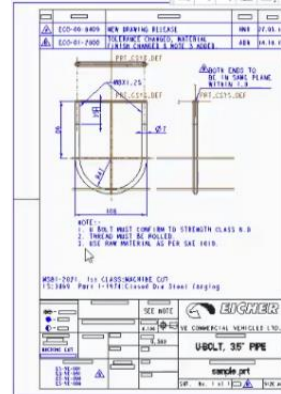

Compatible with Creo, SolidWorks and Inventor

Standard library notes Application

Application Overview / Market Segment Introduction:

Standard library note application is working base Creo (Pro/ENGINEER). Standard library notes automatically place the note in drawing file according to the type of part. With the help of excel/database and attributes in parts, corresponding notes will fetch to the drawing.

Current Scenario (Without Application):

User need to Manually:

- Need to create more notes for each drawing.
- Need to categories the notes according the part and operation to be done.

Negative consequences:

- User will consume more time to collect the details & prepare note for each drawing.
- User can create wrong notes and mismatching notes for the drawing

Positive Business Outcome:

- **ROI** – quick Return on Investment (ROI) considering the significant time savings and reduced ECN's.
 - **Speed** – Few clicks solution to place the notes.
 - **Enhanced User Productivity** - Eliminate Designer/Creo User's non-productive (manual entries) activities, Saving up to 90% of note creation time.
- **Standardization** – Standardization of Process as per company standards.
- **Quality output:**
 - **Error Free** – Eliminates errors (like – mismatching notes, wrong input value, etc.).

How it adds value:

- Works with PTC Creo (Pro/ ENGINEER) Basic Licenses.
- One-click solution that automatically place the notes for corresponding drawing.
- Customized note generates automatically and placed based on drawing file.
- User can select the notes to be placed.

List of satisfied users:

- Volvo Eicher Commercial Vehicles Ltd
